Summary

Python full-stack developer and third-year B.Tech student (Computer Science, AI & ML) who builds REST APIs, React frontends, and database-backed applications. Experienced in integrating trained machine learning models into production-style services with FastAPI, Docker, and AWS EC2. Focused on clean API design, modular code structure, automated testing, and shipping working software end to end.

Education

Bachelor of Technology (B.Tech), Computer Science Engineering (AI & ML) Expected: 2027
Jodhpur Institute of Engineering and Technology, Jodhpur, Rajasthan CGPA: 6.68

Technical Skills

Languages	Python, JavaScript (React/JSX), C, C++
Backend & APIs	Flask, FastAPI, RESTful API Design, Uvicorn, Swagger/OpenAPI Docs, Service-Layer Architecture
Frontend	React, JSX Components, REST API Consumption
Databases & ORM	SQLite, SQLAlchemy
AI Integration	Serving ML Models as Inference APIs, Probability Thresholding, scikit-learn, TF-IDF, Logistic Regression, Text Classification, Generative AI Fundamentals
Data & Libraries	Pandas, NumPy, Matplotlib
Testing	pytest, Unit Testing of Business Logic
DevOps & Tools	Docker, AWS EC2, Git, Linux

Internships & Training

Data Science and Machine Learning with Gen AI – Intern May 2026 – Aug 2026
GRRAS Solutions Pvt. Ltd., Jaipur

- Completed a four-month internship in Data Science and Machine Learning with Generative AI, awarded a Certificate of Internship with distinction.
- Completed the assigned project on time, with performance noted by the company as exceeding expectations.

Ethical Hacking Training Internshala

- Completed the training program and was recognized as a Top Performer.

Projects

Meeting Room Booking System (Full-Stack) GitHub

- Built a full-stack application with a Flask/SQLAlchemy backend and React frontend to view and create meeting rooms and book time slots without double-bookings or overlaps.
- Designed REST endpoints with a unified {data, error} response envelope, giving the frontend a single, predictable place to parse results and errors.
- Isolated time-slot conflict logic in a service layer, separate from Flask routing, and split routes into room and booking modules for testability and easy extension.
- Wrote automated tests with pytest covering the booking and conflict rules.
- **Tech Stack:** Python, Flask, SQLAlchemy, SQLite, React, pytest, REST APIs

Malicious Link Detector (ML Inference API) GitHub

- Built and deployed a FastAPI service that accepts a URL, extracts features, and returns a malicious-probability score and a benign/malicious decision.
- Loaded the trained TF-IDF Logistic Regression model once at startup for efficient inference, and persisted feature names to keep training and serving schemas consistent.
- Made the decision threshold configurable, separating model confidence from decision policy.
- Trained the model offline, reaching 93% accuracy, 91% precision, and 92% recall on the test set, up from a 72% accuracy keyword-based baseline.
- Containerized with Docker, deployed on AWS EC2, and exposed interactive API docs through Swagger UI.
- **Tech Stack:** Python, FastAPI, scikit-learn, Pandas, Docker, AWS EC2

Web Interaction Bot Detector GitHub

- Built a behavior-based detector that classifies web sessions as human or bot from interaction patterns such as event timing, session duration, pages visited, and mouse/scroll activity.
- Designed the system around probability scores with an adjustable threshold so the action taken (block, CAPTCHA, log) can follow risk tolerance.
- Generated synthetic sessions, including hard cases like fast humans and stealthy bots, to test the trade-off between false positives and false negatives.
- **Tech Stack:** Python, scikit-learn, Pandas, NumPy

taskr (Command-Line Task Manager) GitHub

- Built a terminal tool to add, list, complete, and delete tasks, with tasks stored in a local JSON file.

Certifications

- Soft Skill Development – NPTEL (IIT Kharagpur, Jan–Mar 2025, Score: 61%)
- Hack-ito 2.0 Participation – GDSC JIET (Sep 2023)
- C Programming Certification – Infosys
- Certificate of Internship, Data Science and Machine Learning with Gen AI – GRRAS Solutions Pvt. Ltd. (Sep 2026)
